Fast, easy LTE connectivity from just about anywhere.

This second generation LTE Mobile Hotspot from NETGEAR is easy to setup in under a minute and can connect up to 10 WiFi devices. In addition, dock it into an AirCard Hub to connect up to 20 devices through WiFi or Ethernet so you can network your devices at home or in a small office. Suited for network operators in the Asia-Pacific region, the AirCard 760S Telstra Mobile WiFi 4G is the 4G LTE service connectivity solution for consumers, mobile workers, and IT management alike.

Accelerated Performance

Supporting download speeds up to 100 Mbps and upload speeds up to 50 Mbps means data heavy applications such as cloud computing and streaming high-definition video are possible—and deliver a noticeably smoother experience.

Easy Management

Monitor your hotspot with real-time information displayed on the LCD screen—including the number of connected WiFi devices, battery life, network name, password, data usage, and more. Scroll to additional screens on your device to get the latest messages, alerts, device information, and firmware status.

Consumer Benefits

It's everything consumers look for. It's easy. It's convenient. And it offers fast internet anywhere they go.

- Connect to the fastest network available (LTE/Dual-Carrier HSPA+).
- Share 4G LTE with 10 WiFi enabled devices + one tethered.
- Quick and easy setup.
- Easy device management with the LCD screen.
- Network the office or home by adding the AirCard Hub.
- Convenient hotspot management with your tablet or smartphone.

IT Manager Benefits

Less time, less money, more security. In other words, perfect for IT managers.

- Reduce the time and money required to test, deploy, and support mobile broadband.
- Reduce the time needed for compatibility testing with corporate applications.
- Ensure security with VPN support and device settings pre-set to WPA2 out of the box.
- Minimize support with a dependable device that's easy for staff to setup and use.

Field Team And Mobile Worker Benefits
